Reasons for Allowance

1. Claims 1-8, 13-16, 18, 19, 25, and 27-30 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1, 13, and 25 include the limitation of a multiplexor for coupling each of the plurality of processors to the bus in response to an owner signal based on the state values in the peripheral registers indicating which one of the processors owns the peripheral unit, which is not shown by the prior art of record in the combination as disclosed and claimed. The examiner interpreted the claims in light of the specification and upon further consideration "While Stirk shows the use of multiplexors, it fails to show coupling outputs of such processors to shared peripherals in response to an owner signal" (page 10 of the Remarks). The examiner also found Applicant's argument "Tanaka provides no teaching of peripheral-share registers residing at and being associated with each of a set peripherals ... and then operating a multiplexor based on values in these register" (page 9 of the Remarks) persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
